EDUCATION

Bennett University

B.Tech Computer Science (CGPA: 8.25)

Greater Noida, Uttar Pradesh

2022 – 2026

GN National Public School

12th (Percentage: 91.6)

Gorakhpur, Uttar Pradesh

2020 – 2021

GN National Public School

10th (Percentage: 90)

Gorakhpur, Uttar Pradesh

2018 – 2019

EXPERIENCE

Data Analyst Intern (Engineering Focus)

India TV

Dec 2025 – Jan 2026

Noida

- Consolidated data from 6+ sources into unified dashboards, improving reporting efficiency by 35%..
- Developed event-driven automation workflows improving content processing efficiency by 25%.

Software Quality Analyst Intern

sway.club

May 2025 – Jul 2025

Remote

- Executed 200+ JUnit-driven test cases ensuring backend API reliability and achieving 98% critical flow coverage.
- Identified and resolved 40+ API and authentication bugs reducing production issues by 30%.
- Collaborated with developers on API validation and debugging aligned with SDLC and CI/CD practices.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL

Backend: REST APIs, Node.js, Express.js, OOP, Multithreading, Collections

Frontend: React.js, Next.js, Tailwind CSS

Databases: MongoDB, MySQL (Normalization, Indexing)

Cloud & DevOps: AWS (S3, EC2, CloudWatch), Docker, Git, GitHub, Vercel, Inngest

Concepts: DSA, System Design, SDLC, API Optimization, Concurrency, CI/CD

PROJECTS

Stoxie — Stock Tracking System (Next.js, MongoDB Atlas, Finnhub API, Better Auth, Inngest)

- Optimized database queries and indexing strategies, reducing stock search and retrieval time by 80%.
- Implemented rate-limiting and concurrent request handling improving API response consistency by 40%.
- Deployed on AWS EC2 with S3 storage and CloudWatch monitoring; event-driven alert system reduced notification latency by 90%.

AgentMeet — AI Meeting Platform (Next.js, TypeScript, OpenAI, Inngest, trpc, Stream, Polar, PostgreSQL, Neon Database)

- Built a real-time system handling 100+ concurrent users with response latency under 150 ms..
- Designed event-driven workflows handling 20–40 events/min ensuring 99.9% system stability.
- Architected role-based permissions and analytics pipelines, improving engagement tracking accuracy by 25%..

Idea Stash — Content Intelligence Platform (React, TypeScript, Node.js, Express, MongoDB Atlas)

- Built a full-stack MERN application with 12+ REST APIs, JWT authentication, and MongoDB Atlas integration.
- Automated metadata extraction and categorization across 5+ content platforms, reducing manual organization effort by 80%.
- Implemented search, filtering, sharing, and embedded previews supporting 1000+ bookmarked resources.

RESEARCH

Deep Reinforcement Learning Scheduler

IEEE Paper

- Improved workflow execution time by 15–20% over baseline scheduling algorithms using Q-learning.

CORE COMPETENCIES

Software Engineering, Backend Development, Full-Stack Development, Data Structures and Algorithms, Object-Oriented Programming, System Design, REST API Development, Scalable Systems, Microservices, Database Design, API Optimization, Concurrency, Agile Development, AWS Cloud Practitioner, Docker, CI/CD, Database Normalization, Indexing

RELEVANT COURSEWORK & CERTIFICATIONS

Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

Certification: AWS Certified Cloud Practitioner (AWS, 2023)

LEADERSHIP & ACHIEVEMENTS

Smart India Hackathon 2024 Finalist (Top 5%) | Merit Scholarship (Top 10%) | Team Lead — 3 hackathons | Batch Representative (CSE 2026)
