SUMMARY

Software Engineer with internship experience in backend development, data engineering, and full-stack web applications. Proficient in Java, TypeScript, Node.js, React.js, LLM-integrated features and AWS. Deployed 3 production applications end-to-end. AWS Certified Cloud Practitioner. **470+ LeetCode problems solved · 500+ GitHub commits**

EXPERIENCE

Software Engineer Intern

Feb 2026 – Apr 2026

sway.club (e-commerce Startup)

Remote

- Developed backend API endpoints and data models for the social feed and notifications service, handling real-time updates for the active user base.
- Identified and resolved 40+ bugs in OAuth token flows and input validation, reducing production error rates by 28%.
- Configured GitHub Actions CI/CD pipeline with automated test suites, enabling regression checks on every pull request and cutting release cycle from 5 days to 2.

Data Engineering Intern

Dec 2025 – Jan 2026

India TV

Noida

- Created reporting dashboards unifying 6 internal data sources, eliminating 2+ hours/day of manual report assembly for a 15-person editorial team.
- Automated content tagging and routing with Python scripts, processing 500+ articles/week without manual intervention.

PROJECTS

Metrics | *Live* | *GitHub*

Aug 2026

Feedback Management Platform — Next.js, TypeScript, PostgreSQL, Prisma, Neon

- Built role-based access control across employee, manager, and HR roles with time-bounded manager-report relationships supporting historical tracking.
- Designed a normalized relational schema across 7 models with company-scoped data isolation, enforcing access boundaries on every query.
- Validated system correctness with 16 property-based tests (fast-check, 100+ iterations each) alongside unit and integration test suites.

Stoxie | *Live* | *GitHub*

Oct 2025

Stock Tracking Application — Next.js, MongoDB, Finnhub API, Inngest, AWS EC2

- Developed a real-time stock watchlist with price alerts and Inngest-powered background notifications.
- Optimized MongoDB queries with compound indexes on ticker+timestamp, reducing search latency from 800ms to 150ms.
- Implemented token-bucket rate limiting for Finnhub API (60 calls/min cap), achieving zero dropped requests during peak market hours. Deployed on EC2 with CloudWatch monitoring.

AgentMeet | *Live* | *GitHub*

Sep 2025

AI Video Collaborative Platform — Next.js, TypeScript, OpenAI, Stream SDK, Inngest, tRPC, PostgreSQL

- Engineered a video conferencing platform with AI-powered transcription using Stream SDK for WebRTC and OpenAI for speech-to-text.
- Architected async job pipelines with Inngest for transcript generation and meeting summaries, delivering results within 30 seconds of call end.
- Created role-based access control (host/participant/viewer), session analytics tracking 5 engagement metrics, and type-safe endpoints with tRPC.

EDUCATION

Bennett University

Greater Noida, Uttar Pradesh

B.Tech Computer Science Engineering (CGPA: 8.25/10)

Aug 2022 – Jun 2026

Certification: AWS Certified Cloud Practitioner (Amazon Web Services, 2023)

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, DBMS, Computer Networks

TECHNICAL SKILLS

AI/LLM Integration: OpenAI API, RAG, LLM transcription summarization, async workflows (Inngest, WebRTC)

Languages: Java, JavaScript, TypeScript, SQL

Backend: Node.js, Express.js, tRPC, REST APIs, Microservices

Frontend: React.js, Next.js, Tailwind CSS, HTML/CSS, Responsive Design

Databases: PostgreSQL, MongoDB, MySQL, Indexing, Query Optimization

Testing & QA: JUnit, Unit Testing, Integration Testing, Test Automation, Debugging

Cloud & DevOps: AWS (EC2, S3, CloudWatch), Docker, Git, GitHub Actions, CI/CD, Vercel

Concepts: Data Structures, System Design, OOP, Agile, SDLC

LEADERSHIP & ACHIEVEMENTS

LeetCode: 1,900+ Contest Rating (Top 4.4%) | Smart India Hackathon 2024 Finalist (Top 5%) | Merit Scholarship (Top 10%) | Team Lead — 3 hackathons | Batch Representative (CSE 2026)
